[Welcome to NEEHU!]

Thank you for joining us for this weekend-long all-you-can-eat buffet of hypnotic adventures! Whether this is your first hypnosis convention ever or you've been coming for years, take a moment to reflect on our community and all the progress we have made in the past ten years. Ten years ago, few of us had met in person, trancing in real life was something that most of us only dreamed about, and there wasn't much acknowledgement of hypnosis as a kink in the kink community.

Fast forward to today, where in the past year there have been four (!!!) hypnosis conferences with more than 150 attendees. In addition to the beloved familiar names, we have so many new names and faces in our midst. We are training and inspiring the next generation of attendees and presenters. This year, we welcome 21 presenters who have never presented at NEEHU in addition to 26 more familiar names. Please make every effort to go to some of these fresh new classes!

Please go forth this weekend and have an abundance of mentally, emotionally, and otherwise stimulating experiences. You are in a unique space surrounded by friends, and friends you have never met. This is a place where you can ask for what you need and explore those things that you know in your heart you wish.

Because you are the right people, in the right place, at the right time, so let's make all that we desire happen before it is over.

New? Start here!

Congratulations on making it to NEEHU! We want to make sure you have a wonderful time, so here are some things we think will help you get started:

1. Look for the purple classes on the schedule! They're designed for beginners. The green ones are for everyone, including you!
2. Don't be afraid to ask questions! We love answering them! There will be people wearing "mentor" and "ask me anything" ribbons.
3. Take advantage of Mentored Trance Workshops in the Main room! We have a lot of them scheduled for you.
4. Take care of yourself! We have snacks and water for you. Sleep and a shower are an essential part of every day.
5. You are free to ask anyone to do anything. You are not obliged to do anything with anyone. Others may say no to you; accept that.

Definitions of difficulty levels:

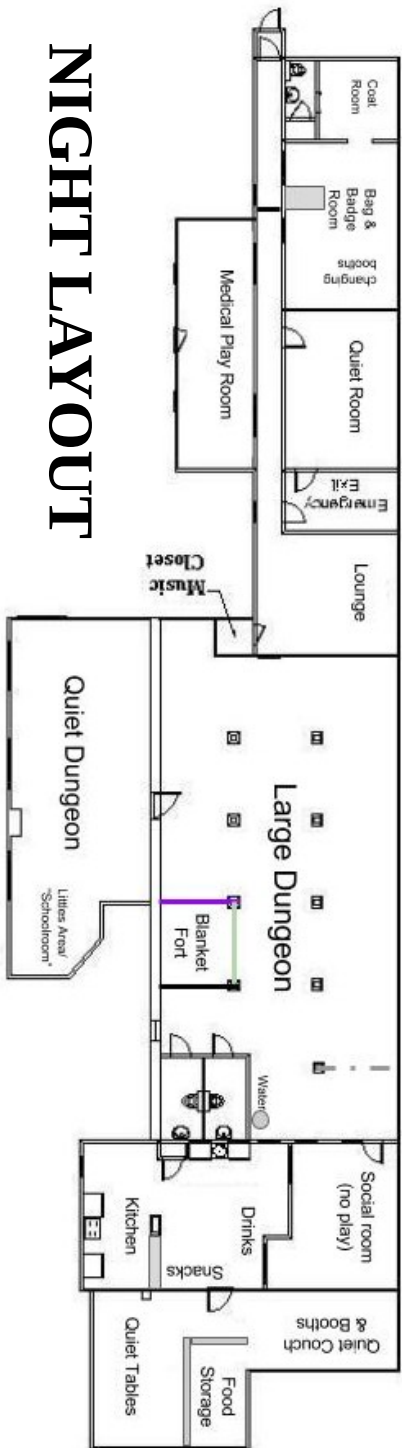

All levels—Everyone will enjoy this class!

Beginner—New to hypnosis, 0-5 sessions, no knowledge is assumed

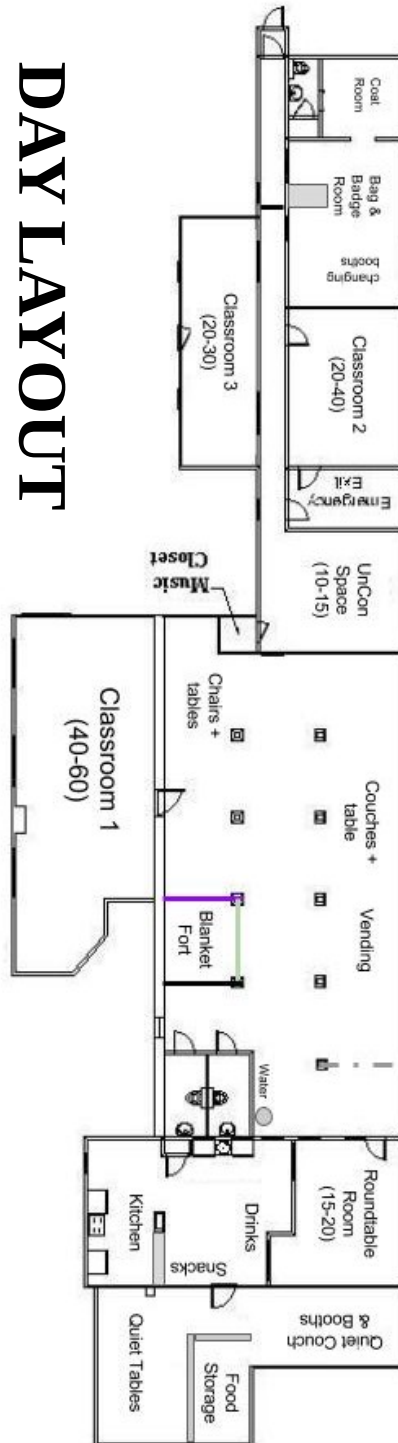

Intermediate—Some hypnosis experience, 5-50 sessions knowledge of basic induction techniques and terminology expected. (This will be you at the end of this conference!)

Advanced—50+ sessions, comfortable with many inductions/suggestion techniques, knowledge of how to handle abreactions.

Class Descriptions

A Painful Frame of Reference: Stabbing, Burning, and More -- Presented by Najalaise

Time: Sat 6:00PM (1 hour, Demo, Hands-on)

Audience/Experience level: Hypnotists, Sadists, Intermediate

May contain: Hypnosis demo, Emotional intensity, Pain, Violence, Fear, Blood

Hypnotic suggestions of pain can fall flat if someone doesn't have a frame of reference for what the specific sensation feels like. Through demos and optional hands-on practice, you'll learn to use lancets, surgical staples, and other simple tools to expand your sadistic repertoire. Then, we'll discuss using these skills to lay the groundwork for a wide variety of hypnotic scenes.

Abreactions -- Presented by Hypnomaestro

Time: Fri 4:15PM (1 hour, Lecture)

Audience/Experience level: Hypnotists, Beginner (0-5 sessions)

May contain: Emotional intensity

Learn how to recognize and respond to abreactions (unexpected, often negative, responses during trance). A must for any beginning hypnotist and a great refresher for experienced hypnotists.

Advanced Triggers for Ensorcelment -- Presented by Hypnoguru

Time: Sat 2:00PM (1 hour 15 minutes, Lecture, Demo, Hands-on)

Audience/Experience level: Everyone, Intermediate (5-50 sessions)

May contain: Hypnosis demo, Orgasm, Consensual non-consent, Post-Hypnotic Suggestions Implanted

For the practitioner who wishes to take post-hypnotic suggestion to the next level, this interactive seminar covers principles of advanced triggercraft geared toward making longer-term suggestions safer yet more reliable--so whether you intend the fun to last an hour or a year, your trance partners can experience the sexy joys of hypnosis, even when you're not there! Discussion includes how to weave fun, self-reinforcing, but self-limiting "curses" you can put in your own hypnotic spellbook. Subjects are encouraged to attend and--who knows?--may come away with a little something extra.

All the Way Down -- Presented by Wiseguy, Dani Fantom

Time: Sun 10:00AM (1 hour, Lecture, Demo)

Audience/Experience level: Everyone, Intermediate (5-50 sessions)

May contain: Hypnosis demo

Sometimes, all your partner really wants is to get taken ridiculously, blissfully, deep. In this session we'll discuss the Esdaile state, or 'hypnotic coma', talk about why you might want to use it, and demonstrate how to get someone into that state and test for it.

Approaching a Top for Play -- Presented by VentrueVixen, MrPrism, Spiral-Turquoise

Time: Fri 4:15PM (30 minutes, Panel)

Audience/Experience level: Subjects, Everyone, Beginner (0-5 sessions)

We talk all the time about consent and respect, but after that what comes next for the sub who just wants to play? Negotiation goes both ways and those who want to be played with should feel just as able to pursue play as those looking to play with them! If you want to learn how to approach a Top for play, set yourself up for success, avoid the ever feared 'creep factor', and get your negotiation basics in hand, this is the class for you.

She was introduced to the world of erotic hypnosis over 5 years ago and hasn't strayed since, helping with the CT scene. She started unknowingly self-trancing through artwork and fire when she was just a wee kitten, and is overjoyed to give feedback for those who are just learning. Over a decade ago she discovered the fire-spinning community, and since then has discovered the joy in eliciting reactions with fire, and teaching fireplay in BDSM. She is an overall hypnopyro just itching to share what she's learned, and is here to bring a new flame to the realm of hypnosis.

Time: Sat 12:00PM (1 hour, Demo, Hands-on)

Audience/Experience level: Hypnotists, Primarily Hypnotists, of interest to Subjects as w, All levels

May contain: Hypnosis demo

I call this class conditioning with pleasure mostly because I'm more a hedonist than a sadist. What "pleasure" actually means depends on the subject - all it needs to be is something that the subject wants and is motivated by. I will take my demo subject through a basic session of conditioning with pleasure, demonstrating and teaching the steps I use. The basic steps are: trance, instant reinduction trigger, speaking in trance, creating a pleasure trigger, eyes open trance, the Tell-Me game, linking and conditioning. There will be some time left for the class for attendees to take a test drive. I classified this as all levels, and it is understandable for all levels. More experienced people will tend to internalize ideas more readily than beginners. It provides a great template for all.

Each will be followed by a short question and answer, to make sure that no one leaves any more confused than they want to be.

HypnoBruce

Bruce first tried hypnosis, very unsuccessfully, in junior high school. Then in the 1970s, he learned the Ericksonian approach along with other NLP training. Things really got started in 2012 when he did additional training and turned professional. He began teaching hypnosis that same year. Notable hypnotists he has trained with include Richard Bandler, Steven Gilligan, Steve Andreas, Mark Cunningham, Mike Mandel, Ines Simpson and Igor Ledochovski. He quickly zeroed in on sexuality and relationships and began running the HypnoToronto group on FetLife. On the kinky scale from pain slut to hedonist, he clearly resides at the hedonist end of the scale. He is also a certified coach and trainer in Orgasmic Meditation. This will be his fourth NEEHU. His YouTube Channel: TheOrgasmChannel should be live by the time NEEHU is held. Attendees particularly like his workshops because they are so participative.

Dr. Headcrash teaches hypnosis as a collaborative process based on building trust and rapport between subject and hypnotist and encouraging effective communication on both sides. He is co-founder of the San Francisco Bay Area Erotic Hypnosis Group (a Society of Janus SIG) and one of the folks behind the Western Erotic Hypnosis Unconference. Calico

Calico is a relatively new, yet recognizable name to see in hypnosis communities and at EHU, as she often travels to from her home state of Texas to interact with others. She's been seen in classrooms all over, volunteering her skills as a very responsive demo bottom. Having others enjoy her responses and learning from them, whether hypnotists or subjects, is a reward in itself for her. She got her start with presenting just recently at Charmed, having found the feeling of being the one to share knowledge in a class to be joyfully fulfilling. While particularly playful (and arguably catty, true to her name) in her approach, Calico likes to use her background as a subject to provide a complementary point of reference to other teaching styles to ensure everyone is able to learn the best way for themselves and have fun doing so.

AmHypnotic

AmHypnotic got involved with hypnosis merely to learn how to help himself sleep during stressful college times, not taking long to think of many various erotic possibilities. A couple years later, he got involved with the New England Hypnosis Group (NEHG) soon after it started, and the NYC Hypnosis group at its beginnings. Since before he learned of his interest in hypnosis, he's always loved people watching, getting reactions, and teasing in general, and his style with erotic hypnosis tends to reflect this. He came into BDSM secondarily after figuring out his interest in erotic hypnosis, and thus he has a style that strongly intermingles BDSM, hypnosis, and light-hearted teasing.

She has several partners and maintains different power dynamics with each, but she just can't seem to get away from hypnosis (nor would she ever ever want to.) With 8 years of experience as a hypnotic subject, she looks forward to designing and teaching classes that focus on the submissive's experience while still providing tops with more perspective on their beloved subbies.

It's only too late that you realize, you're saying the mantra as well. We think those stories are hot, too, and this is our attempt to make it happen. We will send you down as deep into a group trance as we can, and bring you back safely. Will you be changed? There's only one way to find out. There is live and pre-taped component to this. Doll Play, Bimbofication or just like dressing up in fetish wear... what really happens to your body in a corset or stilettos? Over 100 muscles in the body change the way they work as soon as we put on a pair of heels, never mind when we have that corset cinched. Learn what you can do before and after your time in your favorite heels, corset or other restrictive clothing to minimize long term effects on your body, as well as make your time in your best outfit feel as good as you look. Exercises to prevent issues, relieve tension and restore natural biomechanics will be taught. Please wear something you will be comfortable moving in, bring or wear a pair of socks and bring a tennis or rubber pinky ball with you (if you have one).

Sensations -- Presented by HypnoBruce

Time: Sat 9:00AM (1 hour, Hands-on)

Audience/Experience level: Everyone, All levels

May contain: Hypnosis demo

The sensations I'll be talking about are visceral sensations - that knot in your gut, that light, swirling feeling in your head, that cold chill in your spine. These are the building blocks of our reality. You can learn to sense them in yourself, you can sense them in others, you can take on the sensations of another and appreciate their inner experience. Once you learn to notice and read sensations, you can start to play with them and gain a surprising measure of control over your own experience and those of your subjects. Where it really starts to get interesting is when you (and your subjects) come to understand that they have voluntary control over these sensations - and these sensations are the determiners of emotion and mood. It may initially sound like this is mostly for hypnotists - it is really for everyone!
